

Ethanol Production Operations Training

ERI Solutions, Inc. (“ERI”) is always looking for opportunities to reduce or eliminate risks in the ethanol production industry. As not all risks associated with the ethanol production process can be eliminated by engineering controls, administrative controls such as training. ERI recognizes that although training does not remove the risk, it does ensure your personnel understands them and is competent in the industrial systems they are responsible for operating.

THE FOLLOWING TRAINING MODULES INCLUDED:

- 
- 3D Equipment Library
 - 3D Virtual Facility
 - Ethanol 101 – Overview
 - Grain Milling
 - Cook
 - Fermentation
 - Corn Oil Processing and Storage
 - Dehydration
 - Distillation
 - Ethanol Load Out
 - Ethanol Storage
 - Evaporation
 - Liquid Solids Separation
 - Raw Material and Chemical Storage
 - Regenerative Thermal Oxidation (RTO)
 - Rotary Drum Distillers Grain Drying
 - Secondary Milling
 - Thermal Oxidation (TO)
 - Water Treatment

In addition to these standard training modules, ERI is happy to partner with clients as well as technology providers to develop a module to train on their specific system(s).
